MARMA J GAMING DAO PITCH DECK

Why us

Marma J Gaming is a crypto-based gaming world, where you can unleash your creativity, battle with pets, explore dungeons, and become a master tactician.

Mission Statement

Our goal is to educate and onboard gamers and game developers into Web3 by providing the tools and resources to gain life skills through game play.

Overview

The Marma J Gaming DAO ecosystem is a collection of blockchain-based games that use the $PXT token. Players can use $PXT to purchase in-game items such as weapons, portions and gears.

The ecosystem is also home to PixelDapps, a platform that allows users to play, create, and trade these blockchain-based games

The Games

Pixel Party

A NFT Frame showcase built on NEAR Protocol with a total supply of 600 tokens. Each token you owna llows you to draw on a 20x20px frame.

Pixel Pets

A NFT game for pet trading and battling. Each token represents one of 60 total different pet types. Each pet has a certain rarity which affects their strength beneath other stats like quality and level.

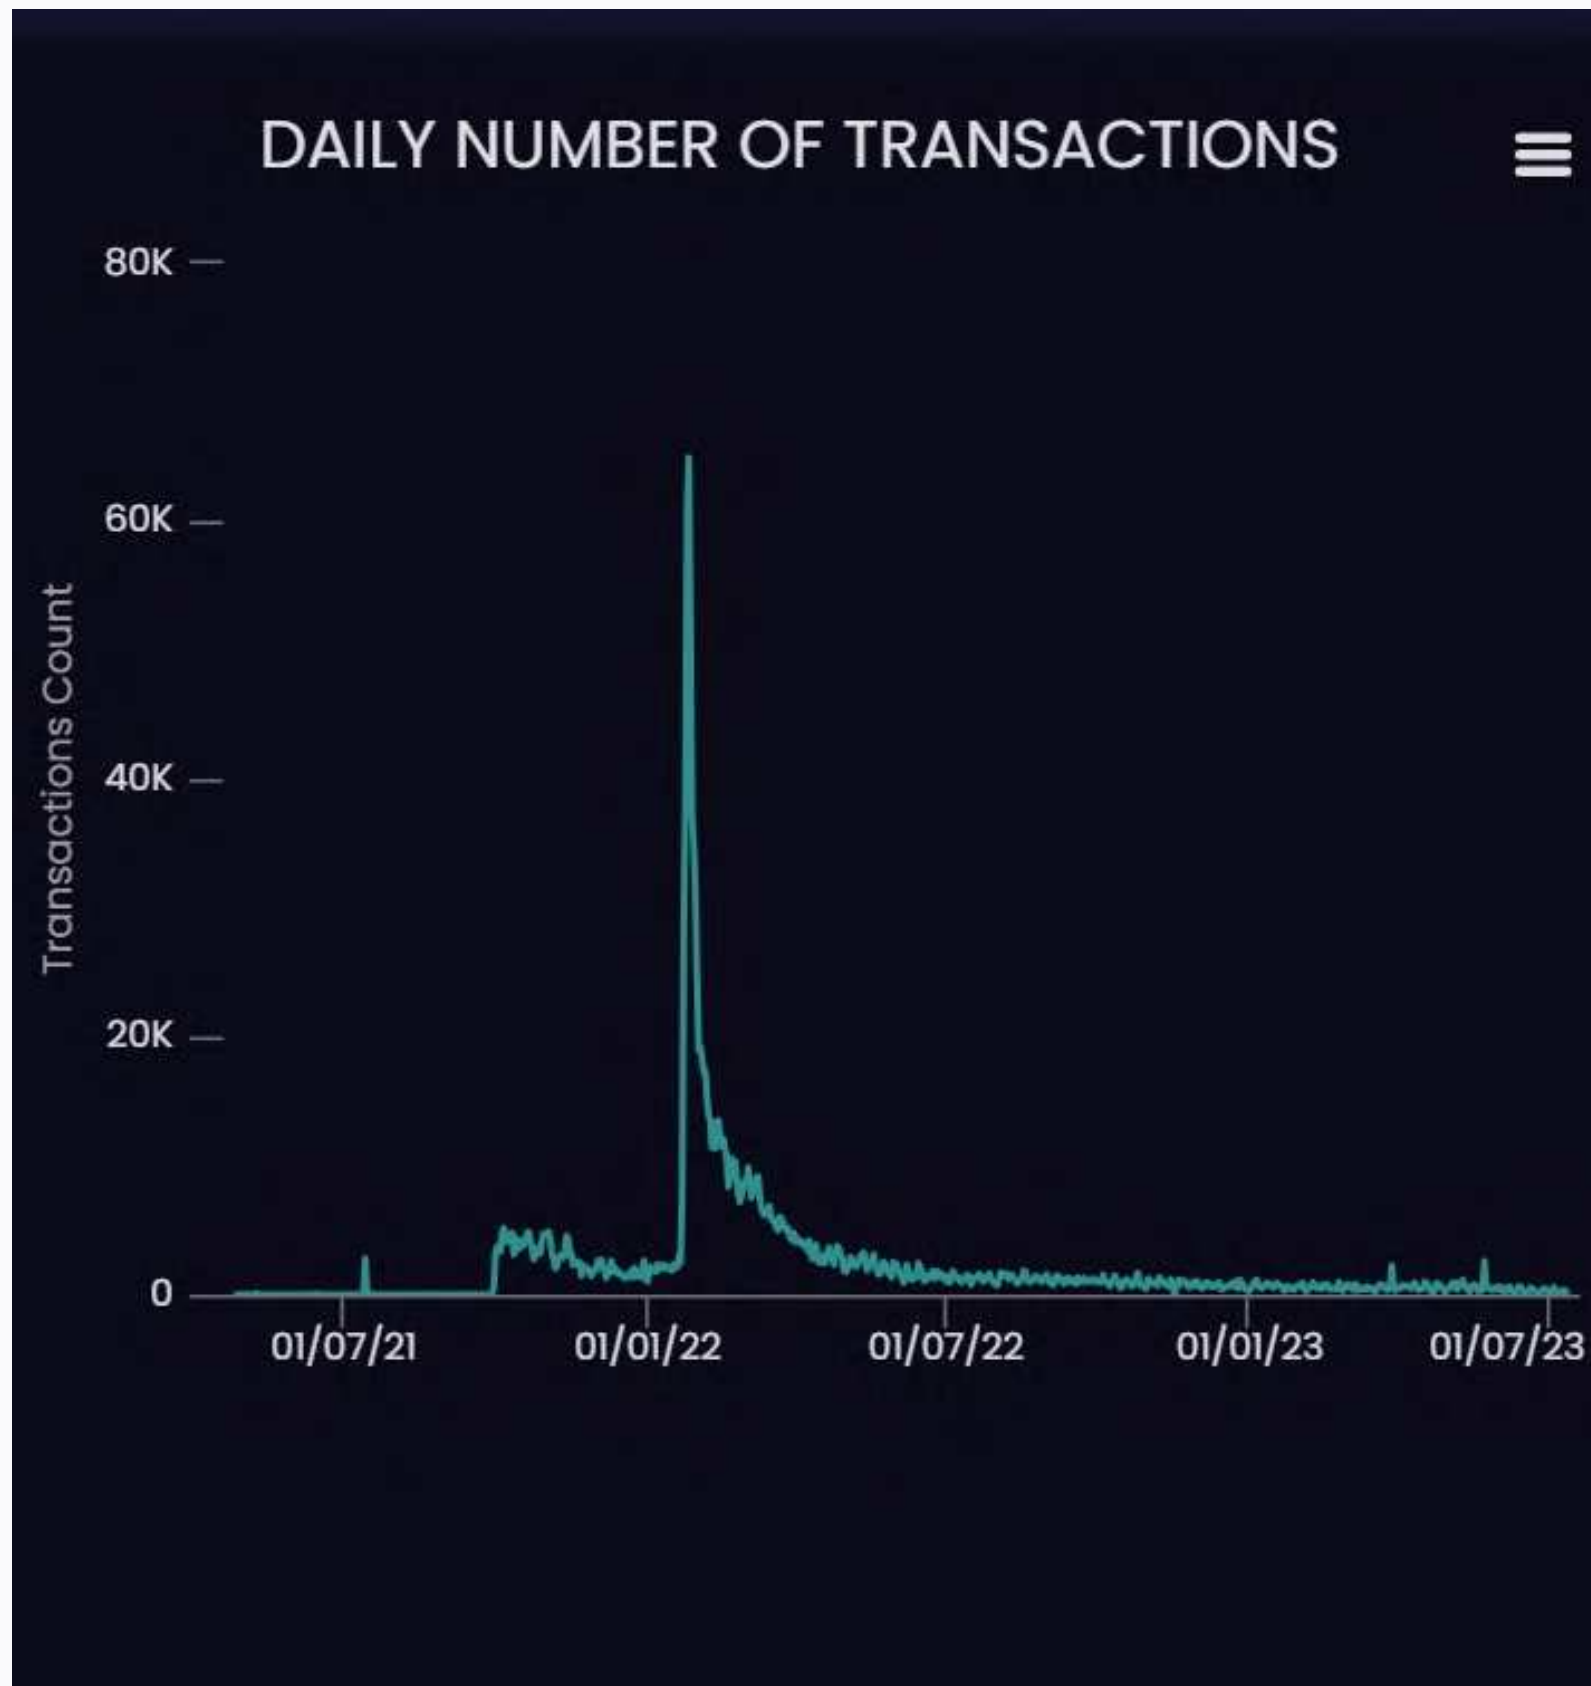

Crypto Heroes

A blockchain-based game, focused on PvE looting, trading and forging items as well as fighting bosses with friends to earn $PXT.

Chain Team Tactics

Chain Team Tactics is an NFT-based PVP battle simulator where players can collect a minimum of 6 units to battle other players!

$PXT Overview

Total Supply: 12.5M

LP: marmaj-pxt

TVL: $3580

MarketCap: $12.5K

Holders: 2.51K

Transfers: $31.14K

Current Partnerships

Significance: Game manegement and smooth operations, Game ideation and development, Innovation and growth.

C1 Guild

A group of artists who are using their skills to empower those in need with NFT tools.

Our partnership is to create a Community-Centered Game Hackathon that brings together developers and creators to ideate and develop a game.
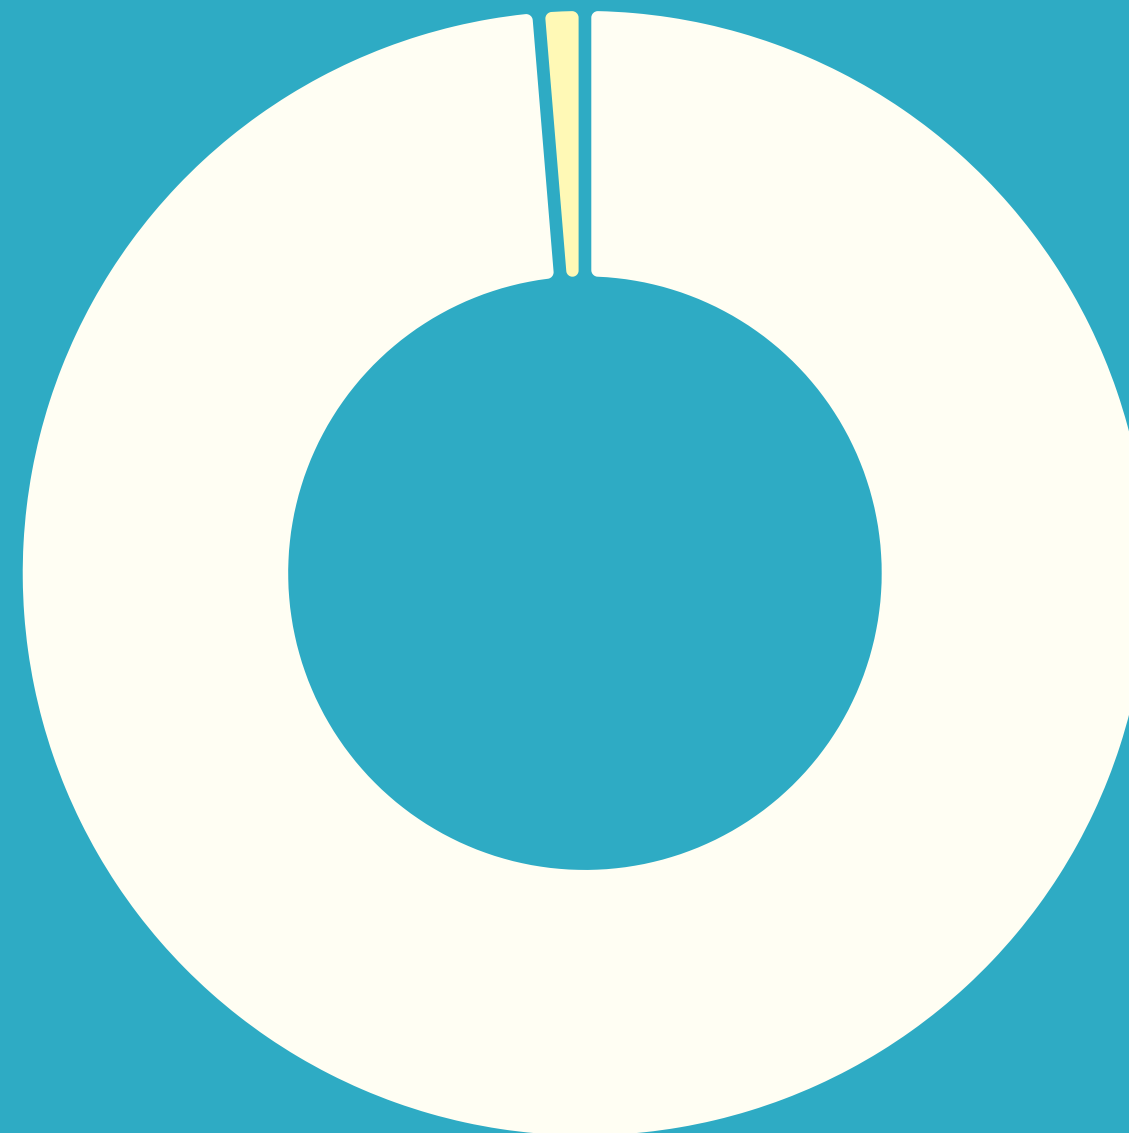

Bac Inc.

Skilled developers who manage and support the games. Experts in widget development for BOS.

These developers ensure seamless operation and enhanced user experiences for players.

Roadmap

- **Build BOS widgets for PixelParty, PixelPets, Crypto Heroes and Chain Team Tactics.**
- **Make all games playable on mobile with wallet selector added.**
- **Build out marketing and community outreach.**

Phase 1
Q1–Q3 2023

- **Launch DAO governance on BOS.**
- **Make existing games playable on BOS.**
- **Add new features to existing games.**
- **Expand community outreach.**

Phase 2
Q4 2023–Q1 2024

- **Launch new games.**
- **Add new features to existing games.**
- **Expand community outreach.**
- **Partner with other blockchain gaming projects.**

Phase 3
Q2–Q3 2024

- **Release new games.**
- **Move gaming contracts to Rust.**
- **Hack at NEARCON.**
- **Attend Marma J CON.**

Phase 4
Q4 2024–Q1 2025

Blockers

Converting AS contracts to Rust

Importance:
- Enhanced performance and pfficiency
- Ecosystem and tooling support
- Security and reliability

Splitting game logic into different contracts

Rationale for spliting:
- Modularity and scalability
- Gas optimization
- Code reusability

Solutions

- Identify and prioritize critical contracts for conversion to Rust.
- Test, audit, and deploy contracts for compatibility, security, and functionality.
- Migrate game logic into separate contracts for modularity, gas optimization, and code reusability.
- Implement a comprehensive deployment and upgrade strategy.

Unleashing the Potential

- **Decentralized Gaming Economy:** Marma J Gaming DAO and PixelToken ($PXT) revolutionize gaming with transparent ownership and secure transactions.
- **Empowering Game Creators:** Fair revenue sharing and decision-making empower game creators.
- **Enhanced Player Engagement:** Play-to-earn models and community building drive player engagement.
- **Cross-Platform Interoperability:** Seamless asset transfer and progress unlock new possibilities.

Call To Action

- **Engage:** Join the community. Connect.
- **Explore:** Discover $PXT. Uncover utility.
- **Get Involved:** Build on the platform. Shape the future.
- **Spread the Word:** Share the vision. Help create awareness.
